

SETTO Supreme S75

Website Image Requirements for Client Asset Collection

Website Image Requirements

This document lists the product and brand image assets recommended for the SETTO Supreme S75 website. High-resolution source files will help the site present the product as a professional 3-in-1 MS Polymer Timber Flooring Adhesive System.

Please provide original, uncompressed files where possible. The web design team will handle cropping, color matching, compression, responsive output, and final website placement.

1. Brand and Packaging Assets

Asset	Website Use	Recommended Format
SETTO logo source file	Header, footer, brand presentation	SVG or transparent PNG preferred
S75 pail front image	Homepage, product page, cards, contact page	White or transparent background, 3000px+ preferred
S75 pail multi-angle images	Product detail and marketing compositions	Front, 45-degree, side, top view
590 ml sausage packaging image	Product format display	White or transparent background, 2000px+ preferred
Packaging detail close-ups	Label, 3-in-1 mark, LOW VOC and performance claims	High-resolution close-up photos

2. Hero and Main Visual Assets

Asset	Website Use	Recommended Scene
Product pail with timber flooring scene	Homepage hero	S75 pail placed in a professional timber flooring installation setting
Product pail with installation tools	Homepage and contact page hero	Pail, V-notch trowel, adhesive ridges, and timber flooring visible together
Wide brand scene	Inner page hero sections	Horizontal composition with product or installation on the right and clean space for page title on the left

Recommended size: 16:9 landscape, at least 3000 x 1688px.

3. Installation Application Photos

Asset	Website Use	Recommended Scene
V-notch trowel adhesive application	Installation page, product benefits	Installer applying S75 with a 5-6 mm V-notch trowel
Timber flooring placement process	Applications page	Timber flooring being placed into wet adhesive bed
On-site installation overview	Project and commercial application display	Clean, bright professional job site with timber flooring
Adhesive close-up	Product performance display	Light Yellow adhesive, trowel ridges, wet-bed application state

4. 3-in-1 Performance Visuals

Feature	Website Use	Recommended Visual
Adhesive Bonding	Benefit cards and technical explanation	Bonding layer between timber floor and substrate
Moisture Barrier	Moisture-resistant feature	Continuous moisture-resistant film beneath timber flooring
Acoustic Reduction	Acoustic feature	Flooring system with impact sound reduction concept
Ultra-low VOC	Environmental feature	LOW VOC mark, certification, or healthy indoor environment visual

These can be supplied as real technical images, diagrams, or source references. If unavailable, the design team can generate consistent visuals based on approved packaging and technical data.

5. Application Scenario Photos

Application	Website Use	Recommended Format
Solid timber flooring	Applications page	Landscape project photo
Engineered timber flooring	Applications page	Landscape project photo
Multi-layer parquet systems	Applications page	Patterned flooring or installation photo
End-grain wood blocks	Applications page	Close-up or project photo
Bamboo flooring	Applications page	Landscape project photo
Cork flooring systems	Applications page	Landscape project photo
Exotic timber species	Applications page	Premium timber visual
Underfloor heating compatible floor	Homepage and applications page	Flooring system or underfloor heating visual
Commercial timber flooring project	Homepage and applications page	Professional commercial project photo

Recommended size: landscape 4:3 or 3:2, at least 2000px wide.

6. Technical Document Assets

Asset	Website Use	Status / Requirement
Technical Data Sheet PDF	Website download links	Please provide final approved version
TDS page exports	Certificate and product page preview	High-resolution JPG/PNG exports from final PDF
Test reports or certification images	Technical trust and certification display	GBCA, VOC, laboratory reports if available

Priority List

Priority 1: Required • Logo source file • S75 pail front image • S75 pail multi-angle images • 590 ml sausage packaging image • Final TDS PDF	Priority 2: Strongly Recommended • Product with installation scene • V-notch trowel application photo • Timber flooring placement photo • Real project application photos	Priority 3: Can Be Produced • 3-in-1 system cutaway visual • Moisture Barrier feature visual • Acoustic Reduction feature visual • Blog, CTA, and background visuals
---	---	--

File Delivery Guidelines

- Please provide original high-resolution files, not compressed chat app images.
- PNG, JPG, TIFF, PSD, AI, and PDF files are acceptable.
- Product images should ideally include transparent or pure white background versions.
- Scene photos should be landscape, cleanly lit, and show product packaging text clearly where possible.
- Suggested naming examples: S75-pail-front.png, S75-pail-45degree.jpg, S75-installation-trowel.jpg, S75-TDS-final.pdf.

Post-Delivery Work

After receiving the assets, the design team will crop images for each page, unify color tone, compress web-ready files, export WebP/PNG versions, optimize alt text, and replace all placeholder or generated images across the website.

Prepared for SETTO Supreme S75 website asset collection.
